

**Ready® Mathematics****Unit 2 Mid-Unit Assessment 1****Form A****Solve the problems.**

**1** Over the last 18 months, Katrina has deposited the same amount of money in her bank account each month. If she deposited a total of \$1,170, how much money did Katrina deposit each month?

- A** \$55
- B** \$60
- C** \$65
- D** \$70

**2** Rebecca has 6 yards of ribbon. It takes  $\frac{3}{8}$  yard to wrap one package. How many packages can Rebecca wrap? Explain how to use the model to solve the problem.

Rebecca can wrap \_\_\_\_\_ packages.

**Unit 2 Mid-Unit Assessment 1** *continued***Form A**

- 3** Which of the following problems can be solved by finding  $8 \div \frac{1}{4}$ ?

Choose all that apply.

- A** A restaurant starts the day with 8 pans of lasagna. Each serving is  $\frac{1}{4}$  pan.  
How many servings of lasagna does the restaurant have?
- B** A recipe calls for  $\frac{1}{4}$  cup of flour. How much flour is needed for 8 batches of the recipe?
- C** 8 people equally share  $\frac{1}{4}$  pound of granola. How much granola does each person get?
- D** Malcolm is writing an 8-page essay. He writes  $\frac{1}{4}$  of the essay.  
How many pages has Malcolm written?
- E** Ramona spends 8 hours making picture frames. If each frame takes her  $\frac{1}{4}$  hour to make, how many picture frames does Ramona make?

- 4** Solve:  $962 \div 26$

**Show your work.**

**Unit 2 Mid-Unit Assessment 1** *continued***Form A**

- 5 Which division equation is represented by the model?

- A  $\frac{3}{4} \div \frac{1}{8} = 6$
- B  $\frac{3}{4} \div \frac{1}{6} = \frac{1}{8}$
- C  $6 \div \frac{1}{8} = \frac{3}{4}$
- D  $8 \div \frac{3}{4} = 6$

- 6 Jacob signs up to work for  $2\frac{1}{2}$  hours at the school carnival.  
If each work shift is  $\frac{3}{4}$  hour, how many shifts will Jacob work?

**Show your work.**

Jacob will work \_\_\_\_\_ shifts.

**Unit 2 Mid-Unit Assessment 1** *continued***Form A**

- 7** A bakery needs to make 7 batches of muffins before opening in 4 hours.

Each batch of muffins takes  $\frac{2}{3}$  hour to bake.

**Part A**

Write a division expression and draw a model to represent how many muffin batches the bakery can make before they open.

**Part B**

Will the bakery have enough time to bake 7 batches of muffins? Explain.

---

**Unit 2 Mid-Unit Assessment 1** *continued***Form A**

- 8** Felipe has  $\frac{3}{4}$  acre of land to use for a vegetable garden. He separates the land into vegetable plots that are each  $\frac{1}{12}$  acre. How many vegetable plots does Felipe have? Explain how to use the number line to model this situation and find the answer.

Felipe has \_\_\_\_\_ vegetable plots.
